

BEM 2D: EELS of rectangular waveguide for a parallel trajectory $\epsilon = 12 + i0.1$

Integration over the mode:

$$x_e = 0$$

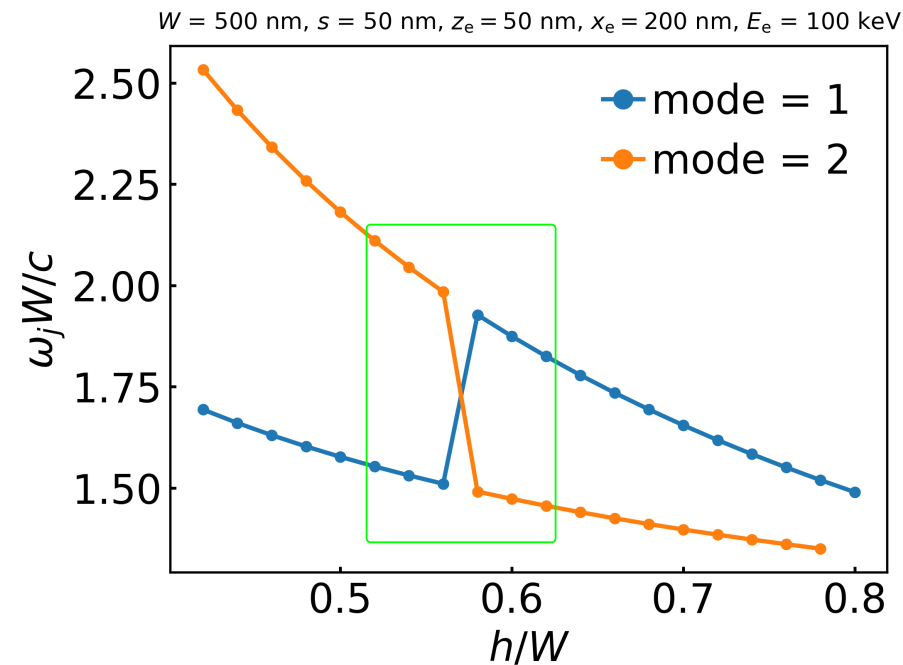

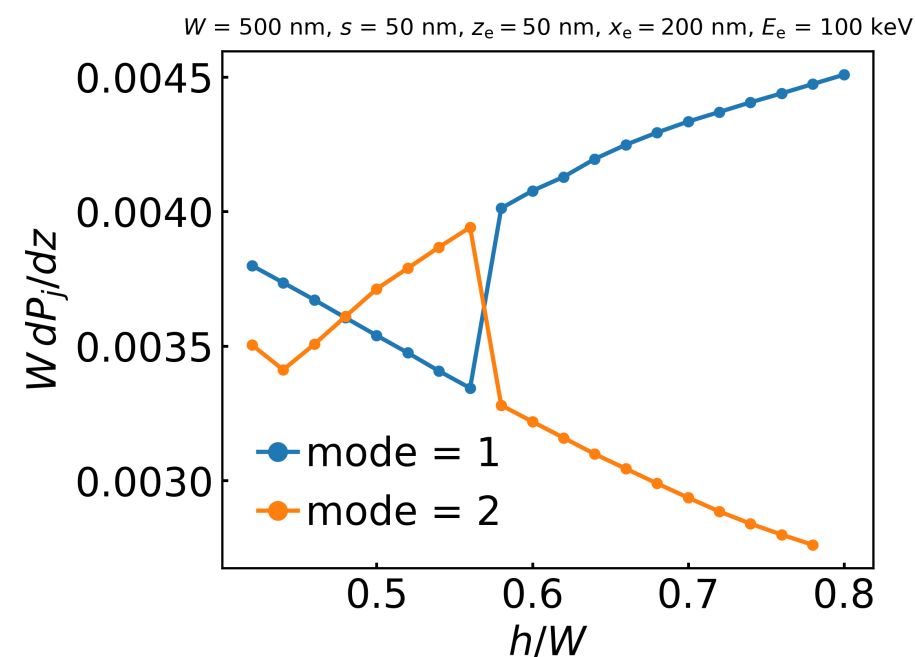

$$N = 400$$

$$s/W = 0.1$$

$$b = 50 \text{ nm}$$

$$E_e = 100 \text{ keV}$$

$$x_e = 200 \text{ nm}$$

Change between mode 1 and mode 2:
