

Electron-coupling to waveguide: notes

CONTENTS

I. Electron coupling to a planar waveguide	1
II. Electron coupling to a waveguide on top of a substrate	2
III. Integration over the parabolic trajectory of the electron	3
A. Constant external field	4
B. Variable external field	5
IV. Electrostatic potential	6
A. Rectangular nanowire	7
B. Three nanowires	7
1. Electron passing above three nanowires	9
2. EELS	9
V. Appendix	11
A. Divergence and transverse energy of an electron beam	11
B. Verification of the electrostatic potential of the three nanowires	11
C. Fresnel coefficients	12
D. Optical response of the materials under consideration	12
References	13
